To the American Eagle Hiring Team:

I am thrilled at the prospect of bringing my Visual Merchandising expertise to a brand as authentic as American Eagle, where storytelling and community connection feel real in every store. Throughout my career, I have specialized in adapting global guidelines into solid local executions, achieving results such as a 74% reduction in campaign costs through local production strategies, without compromising the brand's premium standards.

My approach blends aesthetic sensibility with a sharp business mindset: from strategic floorsets to product management designed to drive traffic and conversion. Having led high-impact projects and coordinated regional teams, I consistently focus on brand consistency and the customer experience. I would welcome the opportunity to discuss how my vision can contribute to American Eagle's growth and elevate the in-store experience.

Best regards,

Mauricio Meyrán
